Environmental Policy

Crummock Surfacing Ltd is a responsible corporate member of the community, and recognises that its activities impact upon the environment both through its operations where there is potential for emissions to air, land and water, and its influence and effects on the wider community.

It acknowledges a responsibility for, and a commitment to, protection of the environment at all levels, and the prevention of pollution.

Crummock Surfacing Ltd commits to complying with environmental legislation and to continually improving its environmental performance in order to:

- Increase awareness of environmental responsibilities among staff;
- Minimise the environmental impact of its operations by reducing the effects of associated noise, dust and disturbance and using local suppliers wherever possible
- Promote environmental management policies and practices at all company sites through education and training of employees in environmental issues and the environmental effects of their activities;
- Incorporate long term strategies for environmental management into corporate planning and development;
- Utilise, wherever viable, materials and products from sustainable or recycled sources, identify and give preference to selection of fairly traded goods where available for our operations, and adopt waste reduction techniques and good housekeeping practices to ensure the most efficient use of non-sustainable resources;
- Avoid wherever reasonably practicable the use of environmentally damaging substances, materials and processes;
- Reduce the use of all raw materials, energy and water and implement recycling where reasonably practicable.

This commitment will be accomplished by the identification of appropriate objectives and the setting of performance targets for all relevant functions throughout the organisation and the implementation of systems compliant with ISO 14001.

Signed

Lee Kennedy
